Professional Summary

I am motivated Full Stack Developer and Information Systems student with hands-on experience building scalable, responsive web applications using modern frontend and backend technologies. I am comfortable building backend systems with Node.js and Express, and I prefer React and React Native for frontend development, along with Tailwind CSS for styling, although I am also comfortable using Bootstrap. I have Strong foundation in database systems, software engineering principles, and RESTful API development. I primarily use PostgreSQL for database management. I am ready and passionate about delivering clean, maintainable, and user focused solutions.

Technical Skills

- Frontend: React,react native,JavaScript , HTML5, Tailwindcss, Bootstrap
- Backend: Node.js, Express.js
- Databases: Postgres, mongoDB, MySQL
- Tools: Git, GitHub, REST APIs, Postman, Figma

Projects

I gained hands-on experience building full-stack web applications using React, Node.js, PostgreSQL, and MongoDB. I built authentication systems, designed RESTful APIs, implemented CRUD operations, and developed responsive user interfaces using tailwindcss. I highlighted two of my projects below and included their live link respectively.

1. I built an AI-powered PERN stack e-commerce platform featuring multi-vendor management and strict, three-tier Role-Based Access Control (Admin, Seller, Client). The system includes an admin-approved merchant onboarding pipeline, flexible checkout via Stripe and Cash on Delivery, an integrated AI chatbot for platform and product inquiries, and automated AI summarization of customer product reviews.

2. I built a full-stack hotel booking web application where users can browse rooms and make reservations, and hotel owners can manage listings via a dashboard. The frontend uses React with dynamic UI, routing, and Context API for state management. The backend features RESTful APIs built with Node.js, Express, and MongoDB, handling authentication, room availability, and bookings. I integrated automated email notifications and Cloudinary for image uploads.

I built my portfolio Website using react, tailwindcss, farmer motion. I designed modern responsive UI, implemented smooth animations, and structured reusable components.

Education

Bachelor of Science in Information Systems (Expected Graduation: 2027 G.C.)
Addis Ababa University, Ethiopia.

Soft Skills

- Team collaboration: I really appreciate eager to work in team.
- Communication: strong verbal and written communication.
- Problem-solving and analytical thinking
- Time and project management (I go no to rest until I finish the days' plan)
- Adaptability and continuous learning (I am highly willing to learn and adopt new technologies in tech industry)

Certifications and sample academic reports are listed below:

1. **This is a web development program completion certificate from “five million Ethiopian coders initiative”.**

Verified Certificate Of Nanodegree Program Completion

Programming Fundamentals

Awarded to

Abinu Mathewos

April 26, 2025

UDACITY
Part of Accenture

Udacity has confirmed participation of this individual in this program. Confirmation at **www.udacity.com/certificate/e/6fb03810-1775-11f0-bd00-6f0d7c884b18**.

3. Some of my academic grade reports:

Academic Year : 2025/26, Year III, Semester : One

1	Introduction to Internet Programming	INSY3081	3.00	5.00	A	Assessment
2	Event driven Programming	INSY2043_	3.00	5.00	B+	Assessment
3	Computer Architecture & Operating Systems_	INSY2051_	3.00	5.00	A	Assessment
4	Introduction to Systems & Networks_	INSY3071_	3.00	5.00	A-	Assessment
5	Fundamentals of System Analysis and Design _	INSY3062_	3.00	5.00	A-	Assessment
6	Research Methods in Information Systems_	INSY3061_	3.00	5.00	B+	Assessment

SGP : 112.5 **SGPA : 3.75**
CGP : 577.25 **CGPA : 3.61**

Academic Status : Promoted
